Flygt C-pumps 3068-3800. Submersible waste and raw water pumps. To reduce the cost of installation Xylem has standardized many of the main elements of pumping stations so that they can be combined to match specific site conditions. The examples illustrated here show the flexibility of the system, and provide some guidelines for optimizing the design of your own station.

Flygt C-pumps 3068-3800 - Xylem US

Overview. The Flygt DP 3068 has a D impeller designed for solids handling. The D-Pump is used mainly to pump abrasive media or low volumes at high heads. This pump features a vortex impeller, which means that the flow is produced not by the impeller but by the rapidly rotating vortex the impeller creates. Consequently most of the particles in the liquid never come into actual contact with the impeller, thus minimizing wear.

Flygt DP 3068 Submersible Wastewater Pumps | Maris Pumps Ltd

WASTEWATER CHANNEL IMPELLER PUMP. Over the years, the classic C-pumps with shrouded impellers have proven to be both reliable and robust. The Flygt C 3068 covers a wide capacity range and is designed to handle different types of media. The C 3068 features a shrouded single-vane impeller with excellent flow passing properties that reduce the risk for clogging in the impeller channel.
