Go 101. "Hello, World!" | by Guillaume Jacobs | Better ...

A "Hello, World!" program generally is a computer program that outputs or displays the message "Hello, World!". Such a program is very simple in most programming languages, and is often used to illustrate the basic syntax of a programming language. It is often the first program written by people learning to code. It can also be used as a sanity test to make sure that a computer language is correctly installed, and that the operator understands how to use it.

"Hello, World!" program - Wikipedia

Every craft has its lore, and "Hello, World" is a key part of the cultural canon in software. Indeed, I'd argue it illuminates some core aspects of coding culture—the good, the bad, and ...

Why the first code a programmer writes is "Hello, World."
