Research Methodology Methods And Techniques

Research methods are specific procedures for collecting and analyzing data. Developing your research methods is an integral part of your research design. When planning your methods, there are two key decisions you will make. First, decide how you will collect data. Your methods depend on what type of data you need to answer your research question: Qualitative vs. quantitative: Will your data take the form of words or numbers?

Research Methods | Definitions, Types, Examples

There are many ways of obtaining knowledge. They are intuition, revelation, and authority, logical manipulation of basic assumptions, informed guesses, observation, and reasoning by analogy. One of the branches of research known as empirical research is highly goal-oriented technique.

Definitions of Research:

RESEARCH METHODOLOGY: TOOLS AND TECHNIQUES

C.R. Kothari Research Methodology Methods and Techniques

C.R. Kothari Research Methodology Methods and Techniques

research studies are undertaken and accomplished year after year. But in most cases very little attention is paid to an important dimension relating to research, namely, that of research methodology. The result is that much of research, particularly in social sciences, contains endless word-spinning and too many quotations.

Research Methodology : Methods and Techniques

Research methods are small part of research methodology. A Research methodology is a multi-dimensional concept. Research methods consist of various techniques where various studies and experiments are used to conduct research and reach an appropriate conclusion.
